

ARMORY

If club gear breaks, please place it in the Armory along with a note explaining the issue. The Armory is located in the rear of the building.

If your personal gear needs repair or assembly, we have a number of people trained in the armory who can help. Donald Lake is our volunteer MTFC Armorer. Our coaches also perform many Armory tasks for their students. A number of parents are also skilled in simple repairs and available to help. Please just ask if you need assistance.

The Armory Price list is posted in the Armory and detailed below. Please pay whoever performs your repair directly. If you leave in the armory for repair, please attach the "ARMORY REPAIR REQUEST FORM", found outside the armory, to the item.

Please allow 1 week for your repair. During extremely busy time periods, such as right before Nationals, repairs may take longer. If longer than a week is needed, the Armorer will let you know at time of request.

All prices listed are for the basic repairs. If a repair is more complicated than usual, you will be given an updated quote prior to work. If a repair is not listed, please speak with the Armorer directly for a price quote.

Parts must be provided at the time the repair is requested. If you do not provide your own parts, the repair may be delayed while parts are ordered in. All part costs will be in addition to the cost of the repair.
